

New Smooth-Cast® Semi-Rigid Urethane Casting Resins...

Better Workability, Improved Physical Properties.

NEW FORMULATION
MERCURY FREE
NEW LOOK

Users have trusted Smooth-Cast® 45D, 60D and 61D for years to make impact resistant parts, prototypes, props, cosplay elements, climbing holds and more. We are pleased to announce that these products have been reformulated with a translucent white appearance and improved physical properties.

All Smooth-Cast® semi-rigids are now mercury free and phthalate free. These plastics are easy-to-use (mix ratio is 1A:1B by volume) and have lower viscosities for minimal bubble entrapment. Vibrant colors are possible by adding SO-Strong® color tints or Ignite® color pigments.

.25 inch panel (.635cm) of Smooth-Cast® 45D is semi-rigid, highly impact resistant and easy to bend.

Now
Translucent
White

New Smooth-Cast® 60D is used to cast an impact resistant toy truck body overlay that fits over a metal frame. The casting exhibits excellent detail and is very durable.
