

NEW!

Free Form® - SCULPT®

Epoxy Sculpting Putty

1. MIX

2. APPLY & SHAPE

3. ADD DETAILER®

Free Form® SCULPT® is a two part epoxy clay that is easy to sculpt with precision using tools or shape by hand. SCULPT® offers the following advantages:

Easy to Use – Mix Parts A & B in equal amounts, apply and shape.

User Friendly & Non-Carcinogenic – Low Odor and Crystalline Silica Free.

Versatile – Working time is a long 1.5 hours during which time the putty goes through 4 transitional phases and each offers new sculpting possibility. SCULPT® has an ultra-fine particle size that gives the user the ability to sculpt finer detail with better precision.

Infinite Color Possibility - SCULPT® is easy to color using SO-Strong® color tints.

SCULPT® is easy to extrude or roll out with no loss of material integrity. Putty will hold vertical surfaces without slumping.

Adhesive – SCULPT® will bond to many surfaces and adding new putty to cured putty is easy. Cured material can be sanded, painted and more.

4. SCULPT FINE DETAIL

NEW! Free Form® - Detailer® Sculpting Enhancer

Detailer® is a low viscosity liquid that makes adding details and detail effects to the surface of Free Form® SCULPT® Epoxy Putty easy.

Control and Precision – Detailer® liquid gives you better control with more precision which allows you to quickly integrate dynamic strokes, fine lines, minute, and repeating texture details (such as hair, fur, or feathering).

Do more... Do It Better; With Free Form® Detailer® you can also smooth, stamp, extrude, etc.

Extrudes Easily

Sand and Post Finish
